General Alvinzy's report is dated at Caldo Perro, Nov. 7. General Eavidovitch's at Trente the 8th inflant.

These corps were successfully reinforced by considerable numbers of fresh troops; and Genera Alvinzy was appointed to command the whole of the army, until it should effect its reunion with Marthal Warmier.

After the arrival of the reinforcements at the places of their defination, General Alvinzy, who in perfon had undertaken the conduct othe corps in the Frioul, arranged a plan of operations, of which the following is a Kerch:

He reports, that they directed their march towards Liftera.

General Proverra's bridge over the Brenta having been defroyed in the courfe of the morning of the 6th, his column could not crofs the river till towards noon on the 7th, and General Alvinay's whole corps arrived late in the evening of that day at the camp of Caldo Ferro.

General Davidovitch had in the mean time driven back the corps opposed to him, had made a thouland pristoners, and taken polifism of Trente, as was mentoned in his former report.
